

# STRENGTHEN YOUR STRUCTURE

## *Ameristar Casino Floor*

### **Project Summary**

The Ameristar Casino selected decorative concrete for the floor finish throughout a majority of its newly completed entertainment facility. Over 40,000 square feet of Bomanite imprinted concrete in four richly colored patterns complements the design's vintage look in the Streetscape area. Over 12,000 square feet of reactive stain finished floors are located in the Buffet and Sports Bar. Additionally, there are 70 LF of stained concrete countertops installed in the Sports Bar.

The cement finishers did an excellent job of maintaining their layout lines to ensure that each Bomanite pattern line remained straight and square throughout the entire streetscape. This was a time consuming and challenging effort given that the 40,000 SF project was broken down into pour sizes ranging from 700 to 1,000 SF.

### **Owner**

Ameristar Casino

### **Architect**

Devine deFlon yaeger, inc.

### **General Contractor**

Alberici Constructors
