

# STRENGTHEN YOUR STRUCTURE

## *St. Louis Commerce Center II*

### **Project Description**

335,000 square foot central distribution facility and corporate headquarters for GPX & Balke-Brown Associates.

The challenge of this project, was to develop a structure that would provide a cost-effective world-class, national distribution hub for GPS while providing an existing, modern corporate headquarters that properly reflected the vision and culture of the world-wide GPX company.

the tilt-up wall structure allowed for the cost-effective yet crisp, clean modern shell for the warehouse while allowing flexibility to show the GPX culture and vision. massive tilt-wall panels were provided angled away from the buildign line to emulate the openness of the corporate offices and culture. Tinted curtain wall structure was provided so that the grand lobby and staircase is clearly visible from the exterior of the building, futher displaying their open corporate business practices.

### **Owner**

Balke Brown Associates
