

FORT ZUMWALT SCHOOL DISTRICT: 2008 FOUR-INCH UNBONDED CONCRETE OVERLAYS

TWIN CHIMNEY'S ELEMENTARY SCHOOL

J.L. MUDD ELEMENTARY SCHOOL

Project Summary:

O'Fallon, MO - Building on the success that began in 2006 with the concrete overlay (AKA whitetopping) of Crestview Middle School in Rockwood School District, the Fort Zumwalt School District completed its first concrete overlays with Twin Chimney's and J.L. Mudd Elementary School parking lots in the summer of 2008. School District officials and their design teams worked closely with Concrete Council and ACPA members, from cement suppliers to ready mix producers and contractors, learning quickly of advantages of concrete overlays. These parking lots utilized a four-inch concrete overlay with 4 foot by 4 foot joint spacing.

Project Team:

OWNER: Fort Zumwalt School District
CONSULTANT: Bax Engineering
CONTRACTOR: Karrenbrock Construction
READY MIX SUPPLIER: American Ready Mix
