

# STRENGTHEN YOUR STRUCTURE

*Washington University "Hilltop" Parking Garage*

## **Structural Economy**

Site-cast concrete is "monolithic." Structurally, this means that there is continuity among elements, allowing the loads to "flow" through the structure. This is accomplished because the walls, floors and columns all work together as a one-piece unit to transfer loads, without bolted, welded, pinned or grouted connections.

## **Developer**

Washington University

## **Architect**

Sverdrup

## **Structural Engineer**

Sverdrup

## **General Contractor**

Tarlton, Inc.
