

STRENGTHEN YOUR STRUCTURE

Private Residence Decorative Concrete

Project Description

This 5,300 sq. foot exposed aggregate driveway was designed to compliment a home in Ladue both in terms of color and style. Because the driveway consists of red granite and gray integral color, special attention was taken in selecting sand for the mix. Grading the driveway to insure run-off away from the circle center was a challenge. The homeowner's objective was to create a new driveway that looked slightly aged and comparable in style to the home. When the Ladue home inspector commented that the driveway was beautiful and looked as if it had always been there, the homeowner knew that the desired effect had been achieved.
